Bepantel is licensed to Good Medical Store,. HMG-CoA Reductase Inhibitors: Beyond Lipid-Lowering Effect. Gout, hyperuricemia and hyperuricosuria may be treated with allopurinol, a xanthine oxidase inhibitor. accuracy; accuracy vs precision; accuracy of rapid covid test . Gout, hyperuricemia and hyperuricosuria may be treated with allopurinol, a xanthine oxidase inhibitor. Gout is the most common form of crystal-induced arthritis. Accurate and rapid assessment of crystals in the joint is important to enable timely diagnosis and treatment of this debilitating disease. Herein, we describe a novel imaging technique for crystal detection and localization in gouty joints. It is based on the measurement of autofluorescence from free. A New Clinical Tool for Gouty Arthritis Diagnosis The most common cause of acute gouty arthritis is deposition of monosodium urate (MSU) crystals in the joint.1 MSU crystals are arachidonate-containing negatively charged glycosylated bilayered particles.2 In the joint, they are released by macrophages and neutrophils stimulated by MSU crystals.3-5 Subsequently, they are phagocytosed by fibroblasts and/or chondrocytes,1,6,7 leading to the development of the characteristic inflamed joint in which MSU crystals are found.8,9 A spectrum of clinical manifestations can occur ranging from acute gouty arthritis to recurrent and more chronic subclinical arthritis, which is seen in 1.7% to 4.9% of patients with gout.2,10 The diagnosis of gout is currently based on demonstration of a monosodium urate crystal within the joint, which is obtained by aspiration of a joint fluid sample. A sample obtained from a joint of a patient with gout is typically positive for urate and often for MSU crystals on microscopic examination.11-14 In the past decade, however, a noninvasive test for rapid and accurate diagnosis of gout has been developed, based on detection of MSU crystals in the urine.14-18 This test, known as the test for pseudogout or gouty arthritis, is available in the US and Europe. The test has a high sensitivity (>90%) and specificity (>95%),11 82157476af
